

The Power of Two High Voltage Leaders

Expanded Capability and Resources for Our OEM Customers

- Extended range of products for mass spec application
- Synergistic technical expertise and manufacturing operations
- Teaming for optimum cost-performance and value for our customers

The combination of Brandenburg and Applied Kilovolts expands the high voltage technology and resources available to our customers throughout the world. Our synergistic product lines and additional operational facility enable broader application solutions and production processes. Together we will advance our position as industry leaders for reliable and precise high voltage products, and we remain committed to adding value for our OEM customers.
